Balayagmanok, Bacong,  
Negros Oriental, Philippines, 6216

A full-stack web developer with over 5 years of experience specializing in Next.js, Laravel, Vue, React, and Tailwind CSS, building fast, scalable, and conversion-focused applications. I've delivered CMS-driven platforms, admin dashboards, optimized user flows, and improved performance across multiple projects in finance and marketing. My strengths include frontend/backend development, API integration, component-based design, and performance optimization.

### Employment History

- **Full-stack Web Developer (Remote, Oct 2021 to Present)**  
Develop dynamic web applications under a Finance tech and Marketing company, convert Figma designs into pixel-perfect and functional websites, tech support and consultations.
- **Freelance Web Developer (Remote, May 2017 to Oct 2021)**  
Build apps and designs for local and international clients using Laravel, Vue, Inertia, TailwindCSS.
